Information Security Management System (ISMS) Lead Implementer

Welcome

The Professional Development Institute® (PDI) is one of the leading international institutions specialized in qualifying and developing professional competencies. It is headquartered in the United Kingdom (UK) and has a proven track record in preparing specialized professionals across vital sectors, including banking, finance, and insurance. PDI is distinguished by offering internationally recognized professional certifications that enhance individual efficiency and strengthen their capabilities in the global workplace.

This program enables participants to acquire comprehensive knowledge and advanced practical skills to plan, implement, manage, and maintain an Information Security Management System based on ISO 27001.

Participants will learn to lead ISMS implementation projects from initial risk assessment through to certification readiness, ensuring protection of information assets and compliance with regulatory requirements. The course emphasizes practical application of information security controls, risk management methodologies, security governance, and incident response planning, qualifying professionals to drive sustainable information security across organizations of all sizes and sectors.

What you will Learn- Key Takeaways

- Understand the structure, requirements, and benefits of ISO 27001 Information Security Management Systems.
- Conduct comprehensive information security risk assessments and gap analysis.
- Design and implement security controls from ISO 27001 Annex A control set.
- Develop and document ISMS policies, procedures, and documented information.
- Apply risk treatment methodologies and establish risk acceptance criteria.
- Lead ISMS implementation projects using effective project management and change control.

What you will Learn- Key Takeaways

- Establish information security governance framework and organizational roles.
- Implement security awareness programs and competence development initiatives.
- Design incident response plans and business continuity procedures for information security.
- Prepare organizations for internal audits, management reviews, and third-party certification.
