ISO 27001 Information Security Management System (ISMS) Foundations

Welcome

The Professional Development Institute® (PDI) is one of the leading international institutions specialized in qualifying and developing professional competencies. It is headquartered in the United Kingdom (UK) and has a proven track record in preparing specialized professionals across vital sectors, including banking, finance, and insurance. PDI is distinguished by offering internationally recognized professional certifications that enhance individual efficiency and strengthen their capabilities in the global workplace.

This program enables participants to acquire comprehensive knowledge and advanced practical skills to plan, implement, manage, and maintain an Information Security Management System based on ISO 27001. Participants will learn to lead ISMS implementation projects from initial risk assessment through to certification readiness, ensuring protection of information assets and compliance with regulatory requirements. The course emphasizes practical application of information security controls, risk management methodologies, security governance, and incident response planning, qualifying professionals to drive sustainable information security across organizations of all sizes and sectors.

What you will Learn- Key Takeaways

- Understand the fundamental concepts of Information Security Management Systems (ISMS) and the principles of information security.
 - Familiarize with the structure, requirements, and benefits of ISO/IEC 27001.
 - Identify the context of the organization, interested parties, and their needs and expectations.
 - Comprehend leadership and commitment requirements for establishing an ISMS.
 - Learn the basics of planning an ISMS, including actions to address risks and opportunities.
- </PAGE> <PAGE 4> What you will Learn- Key Takeaways
