Certified Supply Chain & Logistics Management Director (CSCLMD)

Welcome

The Professional Development Institute® (PDI) is one of the leading international institutions specialized in qualifying and developing professional competencies. It is headquartered in the United Kingdom (UK) and has a proven track record in preparing specialized professionals across vital sectors, including banking, finance, and insurance. PDI is distinguished by offering internationally recognized professional certifications that enhance individual efficiency and strengthen their capabilities in the global workplace.

This program aims to prepare professional cadres capable of managing supply chains and logistics operations with proficiency, by equipping them with the latest theoretical knowledge and practical skills related to planning, procurement, inventory management, transportation, and distribution.

In addition, it emphasizes the use of modern digital technologies such as Artificial Intelligence (AI), the Internet of Things (IoT), and Big Data analytics to improve operational efficiency, enhance customer value delivery, and ensure the sustainability of the supply chain in line with international standards.

PLANNING

DISTRIBUTION

SUPPLY CHAIN
AND LOGISTICS

What you will Learn- Key Takeaways

- Acquire a solid understanding of supply chain and logistics management concepts from both local and international perspectives.
- Develop effective strategies for managing and improving supply chains to achieve organizations' strategic objectives.
- Apply advanced tools and methods for demand forecasting and managing the flow of materials and services.
- Design modern inventory and procurement management plans that balance cost reduction with service level improvement.
- Enhance the efficiency of transportation and distribution systems using best practices in international logistics and e-commerce.

What you will Learn- Key Takeaways

- Employ modern digital systems (ERP, SCM, Blockchain, RFID, IoT) to improve operational efficiency and data accuracy.
- Design and implement integrated systems for risk management and business continuity in supply chains.
- Incorporate sustainability principles and green logistics into operations in line with global trends.
- Comply with international trade and quality standards (ISO, Incoterms, WTO) while strengthening legal and regulatory adherence.
- Develop leadership, negotiation, and relationship management skills with suppliers and customers to achieve supply chain integration
